Drink 750ml **6d ISOTONIC SPORTS DRINK** (200-250ml every 15-20 min) during the bike session. This drink will provide energy, electrolytes and fluids. Drink extra water as needed during the bike session and at every aid station during the run to avoid > 2-3% dehydration. When it's hot and humid consider carrying 1 soft flask of 250ml water with 1 stickpack **6d HYDRO/ORS** during the run.

### OPTIMIZE YOUR RECOVERY!

Consume 1 serving of **6d NIGHT PROTEIN** 30 minutes before bedtime on race day and race day +1d to aid recovery while sleeping!

### TRAIN THE GUT !

Never try a new nutrition plan for the first time during your race! In the final weeks leading up to the race, pick one longer training session per week, and practice your race nutrition plan to make sure your stomach and intestines are accustomed to your race day nutrition plan!
